Music Therapy is the use of music as a tool to help social, cognitive, physical and emotional health, eventually improving the quality of life.

Our Music Therapy program is run by experienced professionals who focus on creating a platform for students to achieve personal growth.

OVER 35 YEARS OF COLLABORATIONS

“The positive effects of our music therapy program are lasting and overflow into all aspects of the Adult Day Health program.”

— Director of Programs, Rogerson Communities Adult Day Health

Our autistic daughter, who had never before communicated at any level, literally ‘found her voice’ in a music therapy session. This discovery has opened up a new world of potential for her and she is now a musical star at her school for students with special needs.”

— Music Center Parent
